

Flame, Flash & Cut Protection Gloves from Uniforce®

New Spec Ops series offers four styles that meet any mission.

Four new gloves from Uniforce® that feature both Nomex® and Kevlar® fabric for the ultimate in flame, flash and cut protection.

There are ten reasons to wear hand protection and you can count them on both hands! Protect your digits with the new Uniforce® Spec Ops series of gloves featuring several advances to combat cuts and burns:

Specially engineered Pittards® leather called FIREBLOC™ with flame retardant properties and resistance to oil and water based stains

Nomex® inner lining for flash resistance

Kevlar® outer shell for added strength and cut and tear resistance

In addition, the Spec Ops series of gloves use DIGITAL® laser etched palm pads for a superior ergonomic grip than traditional

gloves plus more substantial padding for increased shock absorption. TRI-CURVE® construction creates a seamless palm for a better fit and reduced chafing.

Spec Ops gloves are available in two lengths to suit any mission parameter. Choose either the short cuff or the long cuff version (with an additional 4-inch gauntlet) for increased wrist protection. For those needing extra impact resistance, select a hard knuckle version with ABS SHOK SORB nylon protectors.

For those that go into harm's way, the threat from fire and lacerations is common yet preventable. Protect your hands with the new Uniforce® Spec Ops glove series; in stock and ready for order. To more information, visit

BLACKHAWK!® HellStorm® S.O.L.A.G.™ Gloves with Kevlar®

The BLACKHAWK!® HellStorm® S.O.L.A.G.™ Gloves w/ Kevlar® (Special Operations Light Assault Glove) with Kevlar® and leather construction incorporates BlackHawk's® best selling S.O.L.A.G.™ design plus DuPont™ Kevlar® thermal, flash, and cut resistant protection.

Ergonomic cut provides a fit

Dual-layer palm features WRX and Armortan® treated premium goatskin leather

WRX treatment instills excellent water repellency keeping them supple after repeated exposure to water and perspiration

Armortan® process encases the leather fibers in ceramic for 25% more abrasion resistance than similar untreated leathers

Over-wrap fingertip design keeps the seam away from the fingertips to ensure maximum tactility and durability, preventing fingertip "blowouts"

Strategically placed pads protect the knuckles and fingers

Back-of-hand and wrist adjustments

Nylon loop on wrist allows easy donning and attachment to carabiners

Colors: Black or Olive Drab

Weight: 0.4 lbs.

Suggested Retail Price: \$41.99
